

Kaydon Ring & Seal

Aerospace Carbon Seals

for turbine engines

Kaydon Ring & Seal is a leading supplier of carbon seals and sealing rings for turbine engines, auxiliary power units, and auxiliary gear boxes used in both military and commercial aircraft platforms. Decades of engineering, application, and manufacturing expertise go into every product, making Kaydon a “go to” supplier for today’s—and tomorrow’s—program needs.

Bearing compartment carbon seals

Kaydon carbon seal designs are engineered to seal the main shaft bearing compartment and oil sump, for more efficient and environmentally sustainable operation. Carbon face seals and carbon circumferential seals reduce costs by extending life and delivering outstanding performance,

setting quality standards for many commercial and military engines.

Kaydon lift seal designs provide clear performance advantages in reducing heat generation, extending seal life, reducing load on engine oil management systems, and maximizing time on wing.

Quality

Kaydon is known for consistently high quality, using continuous improvement and Six Sigma methodologies to achieve ever-higher levels of performance. Kaydon’s internal quality programs and processes are supported with approvals from ISO9001, AS9100 and NADCAP as well as numerous individual process approvals from the world’s leading aerospace OEMs.

Kaydon Ring & Seal Aerospace Carbon Seals

Project schedule and scope

We support your schedule requirements with design, prototypes, demonstration validation testing and production hardware as needed. Shaft seal runners, spacers, and support structures are often included in Kaydon's scope to simplify the supply of associated seal components and assure the proper interface of mating components.

Seal rig testing and validation

Kaydon has made significant investments in its high speed test rigs to allow demonstration testing for new designs and validation testing of design changes. Testing is performed to match flight profiles for engine applications.

Applications

- Bearing compartment face seals
- Bearing compartment circumferential seals
- Bearing compartment bushing seals
- Main engine bearing compartment seals
- Air seals
- Auxiliary power unit (APU) seals
- Auxiliary gear box seals
- Military aircraft engine seals
- Commercial aircraft engine seals

Count on Kaydon's aerospace application group to help with seal selection, optimization, validation testing, and repair.
