

SKF Scotseal tool board

The right tool for professional installation

The TB-2 SKF Scotseal tool board is designed to protect your SKF Scotseal tools from damage. We all know that using damaged tools leads to early seal failure. Also, this new tool board will decrease down-time because the tool is right where the installer needs it.

Features of the TB-2

- Tool board keeps tools orderly and lessens the chance of tools being lost or misplaced.
- SKF tool board separates SKF tools from other manufacturer tools preventing an improper seal installation and failed seal.
- Handy information card provides Scotseal tool chart, proper bearing adjustment procedures and interchanges.
- Board holds four installation tools plus slot in middle for the SRT-1 seal removal tool.
- Information card hangs from tool board so it cannot be misplaced.
- Back drop illustrates the proper way to assemble SKF tools.
- Overall dimensions are: 30-3/4" wide x 10" high x 6" deep. Hardware kit included.
