- GRB 001 Bearing Basics
- GRB 002 Spherical Roller Bearings
- GRB 003 Angular Contact Ball Bearings
- GRB 004 CARB® Toroidal Roller-Bearings
- GRB 005 Tapered Roller Bearings
- GRL Lubrication Basics

## SmartStart On-line

- PT-MCA1 SKF Machine Condition Advisor
- MT-MV1B1 SKF Microvibe

An RMI on-line subscription includes access to all listed courses for one year per person.

(Part # AEX-RMI)  
Tuition \$395

## Learn at your own place and pace

The on-line area of SKF Reliability Maintenance Institute (RMI) offers an expanding range of e-learning courses covering a range of topics. This enables self-paced learning to be enjoyed by the participant at the time and place that best suits their situation.

## Tutor support

Our “ask the expert” functionality provides the learner with direct access to our extensive network of subject matter experts, ensuring maximum effectiveness of the learning experience.

## Certification

On completion of the course the learner can take a test and receive a certificate in the mail.

## Structured learning path

These e-learning courses are an integral part of Reliability Maintenance Institute’s extensive training portfolio. They are designed to complement the higher level courses that are delivered by our specialist training staff. Like RMI’s face-to-face training, RMI On-line courses are structured according to the five facets of SKF’s Asset Efficiency Optimization (AEO) process.

You can find RMI On-line by following the link in the navigation panel (on the right of @ptitudeExchange pages). [www.aptitudexchange.com](http://www.aptitudexchange.com).

Summary information about each of the courses is provided in @ptitude Exchange.

You will need to log into @ptitude Exchange to see the summary information.

To arrange a subscription simply follow the link on the @ptitude Exchange home page ([www.aptitudexchange.com](http://www.aptitudexchange.com)). You can purchase an individual course, or you may prefer to invest in one of the subscription packages that are available. You can purchase on-line or by means of a purchase order through your local SKF sales office. If you have logged in, and have a subscription to the selected material then you will see a link to RMI On-line service pages on the course summary. When you click the “start service” link in @ptitude Exchange a new window will open presenting you with the RMI home page. The RMI On-line service operates only in English. Additional languages will be made available with customer demand.

## Basic system requirements

RMI On-line is powered by a market leading Learning Content Management System (LCMS). This allows fast and efficient delivery of sophisticated training materials to make your learning experience more interesting, enjoyable and effective.
